

PEDS - PEDIATRIC MEDICINE

PEDS 701 Pediatric Clerkship (2-12 Credit Hours)

Core Pediatrics places an emphasis on primary care of the newborn to the adolescent. In hospital and/or ambulatory settings, the student gains a greater understanding of the continuum of child development, including physical, social, and emotional aspects, as well as the role of family dynamics. The student develops communication skills with both the pediatric patient and the family and, as appropriate, refines their skill at educating the child, parents, and other caregivers in health promotion. May be repeated for credit.

Academic Level: Graduate

PEDS 721 Pediatrics Elective I (2-6 Credit Hours)

Core Pediatrics places an emphasis on primary care of the newborn to the adolescent. In hospital and/or ambulatory settings, the student gains a greater understanding of the continuum of child development, including physical, social, and emotional aspects, as well as the role of family dynamics. The student develops communication skills with both the pediatric patient and the family and, as appropriate, refines their skill at educating the child, parents, and other caregivers in health promotion.

Academic Level: Graduate

PEDS 722 Pediatrics Elective II (2-6 Credit Hours)

Core Pediatrics places an emphasis on primary care of the newborn to the adolescent. In hospital and/or ambulatory settings, the student gains a greater understanding of the continuum of child development, including physical, social, and emotional aspects, as well as the role of family dynamics.
