Mission

The College of Business at the University of New England is a caring and collaborative community that offers a student-centered and technology-driven education. Emphasizing experiential learning, our ecosystem equips graduates with essential skills and knowledge for successful careers through industry-focused programs that promote innovation, teamwork, ethical leadership, a global perspective, and social responsibility.

Minor Description

An Economics minor provides essential skills to analyze how economic forces shape industries, policies, and societal challenges.

With an Economics minor, you will:

- Evaluate how macroeconomic trends and policies influence funding and access in areas like healthcare, education, and conservation.
- Apply microeconomic principles to improve resource management, public health initiatives, and environmental sustainability.
- Leverage data-driven tools to address real-world issues, such as school funding, healthcare disparities, and environmental policy.

An Economics minor equips you with critical thinking skills and a broader perspective, enhancing your career prospects in any field.

Students in majors outside of Economics may declare a minor in Economics with approval from the program director.

Transfer Credit

See Undergraduate Admissions (<https://catalog.une.edu/undergraduate/admissions/>) for more information.

Admissions

See Undergraduate Admissions (<https://catalog.une.edu/undergraduate/admissions/>) for more information.

Financial Information
