

NOR'EASTER CORE CURRICULUM

Nor'easter Core Curriculum Framework

The Nor'easter Core (NC) curriculum ensures that all UNE undergraduates develop depth, breadth, and rigor in their education. The core curriculum identifies seven content areas that are critical to understanding our complex and evolving world, and it ensures that UNE undergraduates pursue foundational study in each, which is subsequently reinforced throughout their education. In total, students take 13 core courses, reflecting 40 credits, to fulfill their general education requirements. The seven Critical Content Tenets of the Nor'easter Core curriculum are:

- Power, Knowledge, and Justice
- Human Experience
- Human Health
- Health of Natural Ecosystems
- Creativity and the Arts
- Quantitative Reasoning
- Scientific Method

Nor'easter Core Curriculum Objectives

The Nor'easter Core Curriculum prepares students to:

- Express original ideas through written, oral, and graphical forms;
- Demonstrate the ability to collaborate and learn with and from others;
- Apply disciplinary and interdisciplinary knowledge, including creative and critical thinking, problem-solving, decision-making, and quantitative reasoning in academic and real-world situations.

Overview of the Nor'easter Core Curriculum

The Nor'easter Core curriculum engages students in a breadth of academic study and develops intellectual skills characterized by a well-scaffolded sequence of scientific, mathematical, humanities, and social-behavioral coursework. The following visual depicts the progression and intentionality of the Nor'easter core coursework.

Foundational Knowledge and Skills Courses

One Nor'easter First Year Seminar Course

The first-year seminar course is designed to support first-year students' transition into the academic and social fabric of the university and help align their personal growth with academic success. This course is designated with an FYS attribute in the registration system.

Student Learning Outcomes for FYS:

1. Identify available student services on campus, such as those offering academic assistance, health and wellness support, financial aid, technology resources, and career counseling.
2. Develop a plan for academic success that utilizes evidence-based learning strategies and an understanding of UNE core values, the academic code of conduct, and the Nor'easter core curriculum.
3. Articulate the opportunities and responsibilities that result from membership in a community with a shared purpose, whether university/local, regional, and/or global.
4. Demonstrate the ability to share ideas, evaluate arguments, and/or pose questions related to the disciplinary/interdisciplinary/interprofessional content, either orally or in writing.

5. Demonstrate the ability to locate academic and/or scholarly sources to answer questions posed by the disciplinary/interdisciplinary/interprofessional lens of the course.

One Nor'easter First Year Writing Course

The first-year writing course cultivates effective foundational written and oral communication abilities. This course is designated with an FYW attribute in the registration system.

Student Learning Outcomes for FYW:

1. Analyze their reading and writing practices to identify growth and areas requiring ongoing development. (Metacognition - META)
2. Approach writing as a recursive process, which involves peer review, substantial revision of drafts for content, organization, and clarity (global revision), as well as editing and proofreading (local revision). (Revision - REV)
3. Develop and support written claims by engaging with texts and integrating their own ideas with those of others using summary, paraphrase, quotation, analysis, and synthesis. (Claims & Text Integration - C&TI)
4. Treat reading and writing as connected activities through annotating, taking notes, and using writing for inquiry, learning, and thinking. (Reading - READ)
5. Utilize sentence-level, source integration, and citation conventions in revised, edited, and proofread texts. (Conventions - CONV)

One Nor'easter Creativity and the Arts Course

Students will create an artistic artifact or solution to a problem through creative thinking, authentic personal expression, and innovation. These courses are designated with a CA attribute in the registration system.

Student Learning Outcomes for CA:

1. Recognize in themselves a capacity for creative process, expression, and engagement in the creative arts.
2. Demonstrate an understanding of several of the world's traditions of art and creative expression.
3. Engage in creative thinking to explore a problem or relevant question.

One Nor'easter Scientific Method Course

Students implement the scientific method as a means of acquiring knowledge in a course that includes a laboratory component. These courses are designated with an SM attribute in the registration system.

Student Learning Outcomes for SM:

1. Apply observation, generation and experimentation to test hypotheses and assumptions.
2. Assess the validity of scientific arguments including those in peer reviewed literature.
3. Evaluate and interpret objectively gathered scientific data to draw conclusions in multiple contexts and effectively communicate them in written and oral formats

One Nor'easter Quantitative Reasoning Course

Students apply quantitative reasoning to solve real-world problems. These courses are designated with a QR attribute in the registration system.

Student Learning Outcomes for QR:

1. Identify and apply appropriate methods for solving real-world quantitative problems to make informed decisions
2. Judge the soundness and limitations of an evidentiary argument that is based on quantitative data.

3. Summarize data verbally, numerically, symbolically, and/or graphically to effectively communicate the results of data analysis.

Expanding Awareness of the World

One Nor'easter Power, Knowledge, and Justice Course Within a Social Science Discipline

Students evaluate the challenges of engaging with diverse perspectives, people, and communities and their role in contributing meaningfully to a more just and equitable society at local and global levels. These courses are designated with a PKJS attribute in the registration system.

Student Learning Outcomes for PKJS:

1. Recognize and explain ideas, historical complexities, sociopolitical systems and/or economic systems that produce and perpetuate inequality as well as those that envision and enact justice.
2. Analyze and interpret the intersecting effects of privilege, power, and inequality related to categories of difference such as race, class, gender, sexuality, (dis)ability.
3. Identify and assess how one's situatedness and biases, in global power structures and history, impacts their experiences of and perceptions about the world.

One Nor'easter Human Experience Course Within a Humanities Discipline

Students evaluate human behaviors, institutions, and systems from global perspectives that are grounded in cultural humility through a historical context. These courses are designated with an HEHU attribute in the registration system.

Student Learning Outcomes for HEHU:

1. Identify, describe, and interpret diverse forms of human cultural production and assess how they shape and are shaped by global, cultural and historical contexts.
2. Identify, analyze, and evaluate how human structures and narratives influence individual and collective experience.
3. Demonstrate an awareness of their place in history and the contingency of the modern worldview through critical inquiry and self-discovery.

One Nor'easter Health of Natural Ecosystems Course

Students evaluate the impact of human interaction with Earth systems and best practice solutions to environmental problems. These courses are designated with an HNE attribute in the registration system.

Student Learning Outcomes for HNE:

1. Identify fundamental environmental concepts to generate socially just, creative, collaborative, and sustainable solutions to environmental problems.
2. Analyze the impact of climate change and resource consumption choices on global sustainability by integrating information from the natural and social sciences, the humanities, and marginalized ways of knowing.
3. Act as planetary citizens: aware, appreciative, protective and restorative of Earth Systems upon which they and all life fundamentally depend – to act ethically and responsibly in relation to the earth.

One Nor'easter Human Health Course

Students formulate an informed view of the holistic, multifaceted nature of human health and health equity. These courses are designated with an HH attribute in the registration system.

Student Learning Outcomes for HH:

1. Describe the interdependence of the holistic health of humans, cultures, societies, and natural systems.
2. Develop an informed, ethical foundation for assessing how personal actions impact the health of individuals, communities and the natural environment.
3. Assess how social, cultural, political and economic systems are shaped by individual bias and structural inequality and lead to differential understandings, expectations, and experiences of health.

Broadening Understanding of Social and Global Issues

Students enroll in three additional courses (nine-credits) selected from the Nor'easter Power, Knowledge, and Justice designation (PKJS or PKJO) and/or the Nor'easter Human Experience designation (HEHU or HEO) offered in any disciplinary area.

Nor'easter Power, Knowledge, and Justice – Open Courses

These courses are Nor'easter Power, Knowledge, and Justice courses approved to meet the tenet outside social science disciplines. These courses are designated with a PKJO attribute in the registration system. Student learning outcomes are the same as PKJS.

Nor'easter Human Experience – Open Courses

These are Nor'easter Human Experience courses approved outside the traditional humanities disciplines. These courses are designated with an HEO attribute in the registration system. Student learning outcomes are the same as HEHU.

Deeper Dive in Select Area

The Deeper Dive course requires students to take one 300- or 400- level course outside of their major to provide depth to the general education curriculum. Students choose a deeper dive course from an extensive distribution of approved offerings. Select majors have a designated deeper dive course in order to fulfill all programmatic requirements. The deeper dive courses are designated with a DD attribute in the registration system.

Note: Deeper Dive courses are also coded as meeting other tenets. While students must take one Deeper Dive that satisfies the disciplinary exclusion rule for their program, they may take additional Deeper Dive courses to fulfill other areas of the core if they have not yet satisfied the other tenets.

Habits of Mind

The Nor'easter Core curriculum also recognizes that understanding the challenges in today's evolving world requires uniting problem-based, hands-on, active learning with liberal education. Effective teaching and learning practices require an integration of a complex set of skills conceptualized as habits of mind. All course offerings in the Nor'easter Core curriculum emphasize at least one habit of mind. The Nor'easter Core curriculum's six habits of mind include:

- Civic Engagement: Students integrate knowledge and experiences to engage in and promote a civil society.
- Modes of Communication: Students compose "texts" in a range of modes for a variety of purposes through clear and persuasive communication.
- Information Literacy: Students responsibly construct information, drawing upon credible sources.
- Critical Thinking: Students apply critical thinking skills and habits of mind to make informed decisions and solve problems.

- Ethical Reasoning: Students apply ethical reasoning as a habit of mind in personal, public, or professional settings.
- Collaboration: Students apply strategies for collaboration in diverse disciplinary, interdisciplinary, and interprofessional settings.

Summary

The Nor'easter Core Curriculum is outcomes-based and emphasizes active, engaged approaches to learning. It challenges students to transfer knowledge from one academic area to another, appreciate different disciplinary perspectives on the same topic, and integrate what they have learned to construct their own knowledge. Courses in the Nor'easter Core cultivate effective oral and written communication, collaboration, quantitative reasoning, critical thinking, decision-making, problem-solving skills, and appreciation of diversity. The Nor'easter Core curriculum is intrinsically valuable, influencing graduates to be informed citizens ready to contribute to a complex, dynamic society.
